

GOLDEN AWARD FOR TECHNOLOGY & QUALITY

New Millennium Award

PARIS (France) 2008

INTERNATIONAL
AWARD FOR
TECHNOLOGY

MERIDIEN ETOILE - PARIS

PARIS (FRANCE)
3rd March 2008

FOREWORD

The INTERNATIONAL TROPHY FOR TECHNOLOGY AND QUALITY has been created to identify and distinguish firms from any country in the world that devote their efforts to the development and enhancement of their technological level.

Nowadays, it is necessary to have self-developed technology to be able to compete in any market and enhance exports to the maximum.

Many of the firms that are receiving this trophy have their own technology and even transfer it to companies in other countries, having thus a basic instrument for penetration in world markets.

Technology applied to the industrial concern represents a substantial economic and human effort due to the specialized staff requirements and there is no doubt about the importance for the economy of each country.

Today more than 60 companies are being registered in the Book of Honour of technology. All of them will be receiving the Award that, exceptionally and on the occasion of its 30th Anniversary is named "Golden Award for Technology and Quality".

PREGÓN

El TROFEO INTERNACIONAL A LA TECNOLOGÍA Y CALIDAD se creó para distinguir a empresas de cualquier país del mundo que centren sus esfuerzos en el desarrollo y mejora de su nivel tecnológico. Hoy en día es necesario contar con alta tecnología para poder competir en cualquier mercado y poder potenciar las exportaciones al máximo.

Muchas de las empresas que reciben este trofeo cuentan con su propia tecnología e incluso la transfieren a empresas de otros países, teniendo así un instrumento básico de penetración en mercados mundiales.

La tecnología aplicada al ámbito industrial representa un esfuerzo sustancial y económico que, sin duda es de vital importancia para la economía de todos los países.

Hoy, más de 60 empresas quedan inscritas en el Libro de Honor de la Tecnología. Todas ellas van a recibir el trofeo que este año, al conmemorar su 30º aniversario, excepcionalmente se denomina, "Golden Award for Technology and Quality".

AVANT-PROPOS

Le TROPHÉE INTERNATIONAL À LA TECHNOLOGIE ET QUALITÉ fut créé pour distinguer aux sociétés de tous les pays du monde qui centrent leurs efforts en ce qui concerne le développement et l'amélioration de leur niveau technologique. Aujourd'hui il est indispensable compter sur des avances technologiques pour pouvoir être compétitif dans n'importe quel marché et pouvoir promouvoir les exportations au maximum.

Ce sont très nombreuses les sociétés qui reçoivent ce prix et qui comptent sur leur propre technologie. Cette technologie est, même transférée à d'autres sociétés étrangères, ce qui constitue un instrument basique de pénétration dans les marchés mondiaux.

La technologie appliquée au secteur industriel représente un effort personnel et économique qui est d'une énorme importance pour l'économie de tous les pays.

Aujourd'hui, ce sont plus de 60 sociétés qui vont être inscrites dans le Livre d'Honneur de la Technologie et qui vont recevoir un prix qui, à l'occasion de son 30^e anniversaire et exceptionnellement se dénommera "Trophée d'Or à la Technologie et Qualité".

ВВЕДЕНИЕ

Международный приз «За технологию и качество» был создан для того, чтобы отметить работу фирм и предприятий разных стран, направляющих свои усилия на развитие и улучшение своего технологического уровня. В наши дни необходимо опираться на высокий уровень технологии, чтобы быть конкурентоспособными на любом рынке и увеличивать возможности экспортных поставок.

Многие из компаний, получающих этот приз, имеют собственную технологию и даже передают её компаниям других стран, используя это как основное средство для проникновения на мировой рынок.

Применяемая в промышленности технология является результатом значительных экономических и человеческих усилий и, без сомнения, является жизненно важной для экономики любой страны:

Сегодня, более 60 компаний внесены в Почётную книгу Технологии, и всем им будет вручён, как свидетельство их выдающихся успехов в освоении и развитии новых технологий, приз, который в этом году, в честь своего 30-го Юбилея, в порядке исключения, называется Золотой международный приз «За технологию и качество».

30 YEARS AGO...

And coinciding with the "Annual World Fair for Technology Exchange", the first handing over of the International Award for Technology and Quality organised by Editorial Office took place. The event was held in the SAS Scandinavia Hotel of Copenhagen (Denmark), among enterprises of different countries, which, guided by the prestige of our publishing house, came forward in order to receive an award which was granted for the very first time.

On that solemn occasion, the main lounge of the hotel was specially decorated in order to offer an original frame to this prizegiving ceremony. It was extremely successful and settled the basements of what, later on, has been a yearly appointment with the companies working in order to improve the level of quality of their products and services.

On that occasion, the awarded companies already represented the most different fields of activity and were coming from Europe and America.

Today, on its 30th anniversary, we can proudly say that the International Award for Technology and Quality is, with no doubt, one of the most prestigious ones granted at international level and hold with pride by more than 1.500 companies from all over the world.

HACE AHORA 30 AÑOS...

Se celebró en el SAS Scandinavia Hotel de Copenhague (Dinamarca), coincidiendo con la "Annual World Fair for Technology Exchange" la primera entrega del Trofeo Internacional a la Tecnología y Calidad que organizaba Editorial Office entre empresas de diferentes países, las cuales, a tenor del prestigio de nuestro grupo editorial, acudieron a recibir un premio que se celebraba por primera vez.

En aquella solemne ocasión, el salón principal del hotel se engalanó especialmente para ofrecer un marco original a esta primera entrega que resultó brillantísima, sentando así las bases de lo que sería más tarde una cita anual con las empresas que trabajan en pos de una mejora constante en la calidad de sus productos o servicios.

En esta primera ocasión, las empresas galardonadas representaban ya los más diversos sectores de la producción y procedían de Europa y América.

Hoy, al cumplirse el trigésimo aniversario, podemos decir con orgullo que el Trofeo Internacional a la Tecnología y Calidad es, sin duda, uno de los más prestigiosos que se conceden a nivel internacional y que ostentan con orgullo más de 1.500 empresas de todos los continentes.

AUJOURD'HUI, IL Y A 30 ANS...

Eut lieu au SAS Scandinavia Hotel de Copenhague (Danemark), coïncidant avec la "Annual World Fair for Technology Exchange" la première remise du Trophée International à la Technologie et Qualité organisée par Editorial Office entre sociétés de différents pays, lesquelles, en faisant confiance du prestige de notre groupe éditorial, allaient recevoir un prix qui était décerné pour la première fois.

A ce moment-là, l'énorme salon principal de l'hôtel était spécialement paré pour offrir un cadre original à cette première remise, ce qui fut un très brillant événement et jeta les bases de ce que, plus tard serait un rendez-vous annuel avec les entreprises de tous les pays qui travaillent pour être en quête de l'amélioration constante de la qualité de leurs produits ou services.

Les sociétés lauréates représentaient déjà les plus divers secteurs de la production et provenaient de l'Europe et l'Amérique.

Aujourd'hui, dans son 30ème anniversaire, nous pouvons dire avec fierté que le Trophée International à la Technologie et Qualité est, sans aucun doute, l'un des plus prestigieux qui se décernent au niveau international et commercial et qui est étalé par plus de 1.500 entreprises de tous les pays du monde.

30 ЛЕТ НАЗАД...

В гостинице «САС Скандинавия» в Копенгагене (Дания), совпадая по времени проведения с ежегодной Мировой ярмаркой по технологическому обмену, состоялась первая церемония по вручению Международного приза «За технологию и качество», организованная издательством «ОФИС» для предприятий и компаний разных стран, которые, учитывая престиж нашей издательской группы, прибыли, чтобы получить приз, который вручался впервые.

По этому торжественному случаю главный вестибюль гостиницы был особенно наряден, чтобы создать подходящую обстановку первому вручению призов, которое прошло блестяще, закладывая таким образом основу для того, что позднее стало ежегодной встречей с предприятиями, которые работают с целью постоянного улучшения качества своей продукции или услуг. В тот, первый раз, удостоенные награды компании представляли самые разные отрасли производства и прибыли из Европы и Америки.

Сегодня, когда исполняется тридцатая годовщина приза, мы можем с гордостью сказать, что приз «За технологию и качество», без сомнения, является одним из самых престижных из присуждаемых на международном уровне призов, им обладают более 1500 компаний и предприятий всех континентов.

Program

Programme

MARCH 3rd

3 MARS

"DEGAS" LOUNGE

CAIRO (Egpt)

FIRE FIGHTING PRODUCTS

The roots of Bavaria Group go back to 1923, when Bavaria Brandschutz was first established in Falkenstein, Germany. The objective of the company was to deliver quality fire fighting equipment and provide safety at a time of great need. As an independent company, however sharing the same name, Bavaria Egypt S.A.E was established in 1972 as an Egyptian German joint venture. For almost 30 years, Bavaria Egypt S.A.E had been operating as a nonaffiliated company to Bavaria Brandschutz Industrie GmbH & CO. KG. Bavaria Egypt's main objective has always been to provide innovative, reliable, and sustainable high quality fire fighting products to suit the current and future market demands, providing safety to individuals and the society at large. On a local level, Bavaria Egypt S.A.E today acts as a market leader. It secures the supply of its wide range of products through 20 owned branches throughout the 26 Governorates of Egypt. Thanks to its well developed fleet of customer service vehicles that deliver high quality services on site to 50,000 subscribed customers and is committed to fulfilling their requests within 72 hours, regardless where their premises are located in Egypt. Bavaria Egypt S.A.E has four subsidiaries companies in Egypt. The first is Bavaria Free-Zone S.A.E. located in Port Said and operates within the Free-Zone area advantages. The second is Bavaria Alarm S.A.E. that is specialized in automated alarm systems, fixed installations and is also a solution provider. The third is Bavaria Automotive S.A.E, which provides service vehicles of different applications, and in particular, in the field of fire fighting and rescue. Finally, Bavaria Steel S.A.E is specialized in producing general and special purpose steel profiles, parts, and fittings. After years of Bavaria Egypt S.A.E and Bavaria Brandschutz Industrie GmbH & CO. KG operating as two separate entities, in 1999 both companies merged bringing Bavaria Brandschutz Industrie GmbH & CO. KG part of Bavaria Group. Today, Bavaria Group extends its market endeavors to many countries, in addition to being the largest producer of car fire extinguishers in all over Europe and the Middle East.

Главным направлением деятельности компании является производство качественного пожаротушительного оборудования, обеспечивающего безопасность пожарных в чрезвычайных обстоятельствах.

QUITO (Ecuador)

DRINKING WATER AND SEWAGE SYSTEM

In its 48 years rendering services to the community, EMAAP-Q (Empresa Metropolitana de Alcantarillado y Agua Potable de Quito) has carry out a wide and important work contributing the increase the quality of life of the inhabitants of Quito Metropolitan district. In these 8 years (2000-2008), the current Municipal Administration managed by its Mayor General Paco Moncayo Gallegos, has executed civil works comparable to all the works made on the XX century. If until August 2000, the Municipality has executed 3.221,98 Km of potable water network and 2.925,7 Km of sewage network, during the current administration has been carry houtn 2.368,32 Km of potable water networks and 2.433 Km of sewage network. Till August 2000, was covered 72,28% of potable water service and in December 2007 was covered 97,33 and the sewage water covered from 65,77% to 91,46% in 2007. EMAAP-Q has different projects to cover 100% of the service of potable water and sewage system to the Municipality and surroundings but as Eng. Juan Neira says always will be difficult to cover totally the demanding services because the city is growing very fast and requires continually an increase of its services.

En sus 48 años de servicio a la comunidad, La Empresa Metropolitana de Alcantarillado y Agua Potable de Quito ha realizado una vasta obra que contribuye al mejoramiento de la calidad de vida de los habitantes del Distrito Metropolitano de Quito. EMAAP-Q ha sido considerada por organismos internacionales entre las cinco mejores empresas públicas de América Latina. En estos ocho años de la actual Administración Municipal (2000-2008) liderada por el alcalde, general Paco Moncayo Gallegos, la obra ejecutada es comparable a la realizada en todo el siglo XX. Si en agosto del año 2000 el Municipio encontró 3.221,98 kilómetros de redes de agua potable construidas y 2.925,74 kilómetros de redes de alcantarillado, durante la actual administración se han ejecutado 2.368,32 kilómetros de redes de agua potable y 2.422 Km. de redes de alcantarillado (diciembre 2007) En lo que se refiere a cobertura de agua potable, si en agosto del año 2000 este servicio llegaba al 72,28% del Distrito Metropolitano, en diciembre 2007 llegó al 97,33% mientras que el alcantarillado pasó del 65,77% al 91,46%. De los proyectos para llegar a una cobertura del 100%, unos están en ejecución y otros en fase de licitación. Como dice el ingeniero Juan Neira, será difícil llegar a la cobertura total porque la ciudad crece aceleradamente y a medida que esto sucede aumenta la demanda de servicios.

PLOIESTI (Romania)

RECOVERY & RECYCLING OF METALLIC SCRAP. ALUMINIUM & COPPER INGOTS

INTERCOMEX established in 1992 brings with it more than 15 years of experience in the recycling of metallic materials ferrous and nonferrous . It is completely privately owned. Our range of services includes the processing of high grade quality scrap, scrap trade, recycling of scrap equipment, machineries and cars, end of life vehicles, the provision of demolition work on behalf of customers, cleaning up of industrial sites. The range of services is extended by pyrometallurgy: Aluminium ingots and copper billets. Currently we are in the process of intense growth and high investments in the expansion of our production capacities, increase of the range of our products and access to new markets. So we made a new product in Romani: Ferrous bricks of steel turnings. We are assigned for three patents since 2001 for this product and for the briquetting presse. Also, we posses patent for trade mark. The professional development of our company staff is also important to us. The skilled personnel, new technologies of recycling and modern equipment allow to make our company grow fast and take one of the leading positions of the national market. The implementation of the International standards ISO 9001, ISO 14001 and OHSAS18001 has certainly contributed to the high level of our products and business organization. The certification has been carried out by TUV Thuringen As a sign of an international recognition we have received The International and The European Trophy for Quality, The International Award for the Best Trade Name and International Award for Technology and Quality. We are member of the Bureau of International Recycling –BIR- since 2005. The company makes a major contribution towards environmental protection and recycling.

S.C. Intercomex S.R.L. - малое частное предприятие, созданное в 1992 г. За год предприятие перевозит около 20 000 т металлолома и 1000 т цветных металлов по железной дороге, суше и морю. Современное оборудование и проверенная технология в руках опытного персонала гарантируют наличие высококачественных изделий с низкой стоимостью. Intercomex - надежный партнёр промышленных предприятий, местных властей, малых и крупных предпринимателей и частных клиентов.

GHOM (Iran)

SILK AND WOOD CARPETS

Kashyzadeh was born out of 120 years experience within the trade. They began their own production some 38 years ago, and since then the company has produced some of the finest silk and wool carpets to come out of Qom, Iran by the third generation with the management of Abdol Hossein Reza Kashizadeh. Today, kashyzadeh produces hand made carpets woven by over 1200 Iranian weavers with up to 2,600,000 knots per square meter. The dyes used in the carpet are 99% natural, and are blended at several different locations within Iran. Hossein kashizadeh continued this art with great effort from his early childhood and decided to create innovation in Qom carpet with new looking. Kashizadeh use only the finest materials: the details in their silk shah abbassi rug are woven from gold and silver. Several times his famous carpets were entered in valid international societies and fairs which result in receipt of: MADRID INTERNATIONAL AWARD FOR THE BEST TRADE NAME 2007. ISO9001:2000 FOR QUALITY MANAGEMENT SYSTEM 2008.

Своей известностью и популярностью фирма обязана пальцам художников, которые создают настоящие произведения искусства, производя шёлковые и шерстяные ковры ручной работы. Краски, используемые в производстве ковров – это на 99% натуральные растительные краски.

65005 ODESSA (Ukraine)

ALCOHOLIC BEVERAGES.

Odessa cognac factory was founded in 1863. The enterprise was reformed into closed joint-stock company in December 2002. Odessa cognac factory owns the trade mark "Shustov". The cognac "Shustov" is popular with consumers because of its smooth taste, achieved by using French classic technology during all production stages. Odessa cognac factory is the full cycle enterprise of cognac production. It means, that all stages of cognac production from grape up to maturing of spirits and pouring of elite drink into bottles are taking place at one enterprise. Shustov's spirit distillation shop is the most advanced and huge not only in CIS but also in Europe, equipped with traditional charentais pot stills by Prulo Company from French province Cognac. Odessa cognac factory has considerable areas of private vineyards (about 1000 ga) and the oldest stock of oak casks.

Одесский коньячный завод был основан в 1863 году. Предприятие преобразовано в ЗАО в декабре 2002 г. ОКЗ принадлежит торговая марка «Шустов». Коньяк «Шустов» популярен среди потребителей благодаря своему мягкому вкусу, достигнутому за счёт применения на всех этапах производства классической французской технологии. Одесский коньячный завод является предприятием полного цикла по производству коньяков. Это означает, что все многочисленные стадии производства коньяка – от виноградных саженцев до выдержки спиртов и розлива элитного напитка по бутылкам производится на одном предприятии. Коньячный цех спиртокурения «Шустов», самый современный и мощный не только в СНГ, но и в Европе, оборудован шарантскими аппаратами-аламбиками фирмы «Прюло», расположенной в французской провинции Коньяк. ОКЗ обладает значительными площадями собственных элитных виноградников и старейшим парком бочек.

ABIDJAN (Ivory Coast)*

OIL EXPLOITATION

As the spearhead of the Ivorian energy resources policy PETROCI, the National Oil Company has been involved in exploitation of oil gas in the country since 1975, in partnership with prestigious international companies. With assets exceeding CFA 20 billion, the company supports research and handles production of hydrocarbons and carries out downstream activities along with the associated industries. The objectives is to build a diversified and integrated oil economy, by optimising research efforts and developing hydrocarbon resources. PETROCI serves as a reliable partner making use of his knowledge of the Ivorian sedimentary basin to the benefit of incoming investors. It has participated in joint ventures in the discovery of oil and gas fields such as Believ operated by ESSO (1974-1992) and Espoir by Philips Petroleum (1982-1988) During the 90's, Lion, Panther and Foxtrot have contributed to reinforce the hydrocarbon production potential of the country. In the year 2002 confirmed the viability of oil production activities with the re-opening of the field Espoir with CNR International and Tullow Oil. PETROCI is optimist. A major discovery, by PETROCI and CNR International confirmed the potential of the Ivorian deep offshore. By 2005 production began in Baobab field, and the discovery of other structures will encourage further investments.

Национальная нефтяная компания занимается эксплуатацией нефтяных месторождений с 1975 г., в сотрудничестве с престижными международными компаниями. Компания финансирует научно-исследовательские разработки, занимается производством углеводородного сырья и осуществляет деятельность в сегменте даунстрим, охватывающую и смежные производства. Целью компании является создание диверсифицированной и интегрированной нефтяной экономики путём оптимизации научно-исследовательских работ и развития углеводородных ресурсов.

PLASTIC GOODS PRODUCER

Production cooperative "Plastic" successfully works in the Russian market of polymeric packing already 19 years. Created in 1987 and equipped with the primitive equipment PC "Plastic" already then released high quality production. In 1989 the company seriously modernized its manufacturing site and transited to the completely new level, but and that was not the stop in its development. Today PC "Plastic" has: the equipment, which allows to completely automating all stages of the complex technological process of manufacture of polyethylene packing; constant quality assurance at all stages of manufacture; highly skilled workers; the built precise mutual relations with the suppliers of raw material. All this has allowed to make production highly effective and continuous, to work stably and in terms to carry out the obligations to customers. PC "Plastic" is focused on work with large customers, such, as companies «Moscow - McDonald's» and «Huhtamaki». Cooperation with McDonald's began in 1989 before opening of the first fast-food in Moscow. Then it was completely new qualitative level, and that the Canadian Fast-Food network has chosen as its partners of PC "Plastic" speaks for itself. Besides industrial activity of personal computer "Plastic" actively participates in social programs of the government. Achievements of PC "Plastic" have been marked by delivery in 1997 of the International prize «For aspiration to quality and perfection», in 2005 assignment of an honorary title «National property».

Фирма производит одноразовую посуду и пищевую упаковку. Продукция предназначена, главным образом, крупным потребителям, таким, как компании «Мак Дональдс» и «Хухтамаки». Сотрудничество с компанией «Мак Дональдс» началось в 1989 году, перед открытием первого заведения «фаст-фуд» в Москве.

7500 SILISTRA (Bulgaria)

EXTRACTION, MANUFACTURE & REALIZATION OF INERT MATERIALS & TRANSPORT ACTIVITY

"Polaris-8" Ltd. Silistra is a company successor of a firm with 40 years of history in river deeds on the river Danube. Established for transportation of reed from the riverside marshes with small boats for the needs of construction the firm gradually changed its activity to extraction and transportation of inert river materials with dredges and big ships. The market necessity for materials pressed us to increase the production and from there the transportation capacity, while gradually a relatively big fleet for loose cargo is built. For its activity of manufacture of inert materials "Polaris-8" Ltd. Silistra is the biggest producer in the region. The company has got 400 m. port quay, 3 port cranes, installation for wash and sort of inert materials, laboratory for permanent control of the quality, machinery for expedition, automatic weighing machines. After the changes in East Europe in the 90s the company became private and at the moment it possesses 11 ships with total capacity 14 500 t. During the economic stagnation in Eastern Europe instead of liberating itself from the excessive capacities the managing team of "Polaris-8" Ltd. restructured them and developed purely transportation activities. After active negotiations with shipping agents from Bulgaria and Europe we signed contracts and started transportation servicing of destinations for loose cargo – coke, coal, ore, metals from Ukraine to Bulgaria and Serbia, as well as timber from Romania to Bulgaria. During the past 10 years since the beginning of the international river transportation "Polaris-8" has transported over 2 000 000 t. coke, coal, ore, inert materials, metals and general cargo.

Компания занимается международными речными перевозками сыпучих грузов: кокса, угля, руды, металлов из Украины в Болгарию и Югославию и фанеры из Румынии в Болгарию. В настоящее время компания располагает 11 судами.

DUBAI (U.A.E.)

CONSTRUCTION

Though Roshan Construction LLC (RC) has been established just four years ago, but the roots go far back. Mr. Minoos Jamaji (Managing Director of RC) a descender from a business family of three generations of engineers, started his career in the field of Industrial Construction almost 20 years back in Dubai. RC specializes in Turnkey industrial construction of all kinds of pre-engineered steel buildings such as warehouses, factories, workshops, showrooms, cold stores, offices and staff accommodations. RC offers total turnkey solutions from designing, project management, project execution up to handing over, executing the complete project in house. Operating in a highly competitive environment, RC continuously strives for technological excellence, aimed at fulfillment of maximum needs of the client at the lowest possible costs, passing the benefits to the clients. The company's product management group continuously refines building details with the goal of making components more economical, more aesthetical, more durable and easier to execute. Incorporating the correct combination of built up sections, hot rolled and cold formed sections, single skin sheeting or insulated panels are just some of the ways which makes RC specialists in the construction of pre-engineered steel buildings, the end product being an attractive building that can be finished internally to serve any required function and accessorized externally to achieve a distinctive architectural style.

Компания специализируется на строительстве «под ключ» всевозможных сборных стальных сооружений под склады, цеха фабрик, мастерские, демонстрационные залы, холодильные камеры, офисы и помещения для персонала. Компания предлагает комплексные решения «под ключ» вопросов, связанных с разработкой проектов, их управлением и осуществлением вплоть до сдачи в эксплуатацию полностью на внутрифирменной основе.

WINE PRODUCTION

The works "Koblevo" was founded in 1982 in the seaside village Koblevo of the Nikolajev region on the territory of the landscape park Tiligulo. Industrial production has been launched since 1982, but the greatest turnovers of production was achieved in 1988 with displaying by the works initial and secondary production, i.e. the works turned into the enterprise of the complete cycle: It produces not only wine materials, but realizes bottling of ready wine. In order to obtain deserving wine, it is necessary to be sure in the good raw materials quality that is grapes itself. This is possible only in the event that the winemaking enterprise has own vineyards, like Koblevo. On 1100 hectares of fertile grounds are cultivated such types of grapes as "Cabernet Sauvignon", "Merlot", "Bastardo", "Aligote", "Shardonet", "Sauvignon", "Riesling", "Rkatsetely", "Traminer". There are about 500 persons working at vineyards, being the cultivation exercised by hand from the first sprout. The newest equipment of the Italian companies Dela Toffola, Bertolaso and Ital Project: Bunkers, crushers, membrane presses, stainless steel containers with temperature control of fermentation and storage all contribute to high operating efficiency. Keeping the unique methods and practice since creation of the works the experienced technologists manages to secure the high quality of the product. Such a high-tech alliance make possible the production of all categories of wine: Dry, semi-dry, semi-sweet, fortified, sweet. The palette of the TM "Koblevo" is presented by 33 names of wine production. Annual turnover for 2005 is 12 millions bottles.

Главные задачи компании «Национальные алкогольные традиции» – это создание торговых марок, управление производством и продвижение собственных алкогольных брендов. Компания не только производит виноматериалы, но и осуществляет розлив готового вина, отправляет его покупателям. Компания выпускает все категории вин: сухие, полусухие, полусладкие, крепленые, десертные. Палитра ТМ «Коблево» представлена 33 наименованиями винной продукции.

MANUFACTURER OF HYDRAULIC BREAKER

During the last couple of years, we have been concentrating on globalization of business in both of hard and software. Thanks to the effort, our breakers become one of the most competitive brand in the world construction market.. We will continue our effort to upgrade the quality and function of our hydraulic breakers in order to provide a renewed satisfaction and service to our clients. In the meantime, we are vigorously diversifying our product lines into other attachments and small construction equipments such as skid steer loaders and mini excavators in an attempt to provide a broadener choice of products and services to our clients. This year will become a very important and meaningful year marked by our leaping forward from the limited and highly competitive market into the almost unlimited global market by enhancing the role of our subsidiary company's marketing activity in U.S.A, a wholly invested Shanghai production and marketing company in China, and other European sales and marketing company in the Netherlands. In addition, we are accelerating the digitalisation of our management system introducing ERP system CRM and SCM. By combining all of these activities, our goal for the world best and complete globalization will be realized in 2010.

На протяжении последних двух лет компания занимается, главным образом, вопросами глобализации бизнеса технического и программного обеспечения. Благодаря приложенным усилиям некоторые виды продукции компании стали одними из наиболее конкурентоспособных на международном строительном рынке.

PRODUCTION OF PHYTOSANITARY EQUIPMENTS

Maderas González y Martínez was founded in 1986 and is a young and dynamic family company with future expectations due to its own effort and work. It has 25 workers in payroll. The main goal of the company is the manufacture of phytosanitary equipments for the agriculture and green spaces and also the trade and sale of related products for this sector. It is an innovative and specialized company providing products that meet a competitive and demanding market.

Maderas González y Martínez S.L. fue fundada en 1986 y se caracteriza por ser una empresa familiar, joven y dinámica con gran proyección de futuro, que se ha hecho así misma con trabajo y esfuerzo viéndose ampliada su plantilla a 25 trabajadores. El motor principal de nuestra empresa es la fabricación de equipos fitosanitarios, para agricultura y áreas verdes, así como la comercialización de productos secundarios para dicho sector. Las características principales de Maderas González y Martínez, S.L. es su vocación innovadora y la especialización en nuestros productos para poder alcanzar la máxima eficacia posible ante un mercado exigente y en continuo cambio.

Компания была основана в 1986 г. Это молодая и динамическая семейная компания, подающая большие надежды, благодаря прилагаемым усилиям и ежедневной работе. В штате компании - 25 человек. Главная цель компании - изготовление оборудования фитосанитарии для сельского хозяйства и зелёных участков, торговля продукцией, предназначенной этому сектору.

MGT - MAGNETIC GEARING AND COUPLING

Represented by: Mr. Andrew French, Director.

15 Tarean Str. - +61 2 49973452 - Fax: +61 2 49973073

E-mail: andrew_french@mgt.com.au

2324 KARUAH, KSW (Australia)

MAGNETIC GEARING AND COUPLING TECHNOLOGY

Our magnetic gearing and coupling technology is the worlds first frictionless power transmission. Invented by Andrew French in a small farm in Australia, it was realized that incredible efficiency saving could be gained and more water pumped using solar powered pumps with magnetic gears. Due to no tension with belts and no friction on pulleys, in a comparison test using batteries, the MGT solar pump maintained the same flow rate using 22.7% less power than the same pump coupled with the same motor on a direct drive. MGT utilizes the repulsive forces of magnets to turn two individual shafts with no mechanical connection, i. e. the driver to the driven. The technology can be used as gearing with ratios or as a 1:1 coupling. Other advantages of the technology are that it handles misalignment and you can transmit power through walls or housings as long as they are not conductive. It has also great benefits in terms of mechanical and human safety. After the commercialisation of the invention by selling solar water pumps in Australia, we have tooled up and are now injection moulding these components to provide the market with a cost effective alternative to belts, pulleys, couplings and other forms of power transmission that we traditionally use. We are now seeking companies to market and distribute our product worldwide.

Разработанная компанией технология магнитного привода и сцепления является первой в мире технологией безфрикционной трансмиссии. Сделанное Эндрю Френчем на небольшой австралийской ферме изобретение привело к колоссальной экономии энергопотерь в процессе эксплуатации водяных насосов с магнитным приводом.

INSPECTION AND ASSESMENT OF POWER PLANTS EQUIPMENT

Since its establishment in 1987 PRO NOVUM has been performing services in the field of inspection and assessment of power plants equipment. The services are performed for the benefit of almost all Polish power plants and cogeneration facilities as well as for several foreign ones. Among our customers you can find the largest companies concerned with the repairs and maintenance of Polish power sector, both in Poland and abroad. The knowledge gained during the examination has been taken advantage of in the preparation of advanced technological services including repair, modernization, life extension also diagnostic service based among others, on the computerized adviser-and-expert systems. The Company employs an experienced and competent staff certified to EN 473, has implemented ISO 9001 and ISO 14001 systems and was granted recognition of Urząd Dozoru Technicznego the Polish Official Inspecting Authority. Our laboratories are provided with the up-to-date equipment for all kinds of diagnostic examination. The work of expert teams is supported by the computer systems and the latest engineering software including those using finite element method. Our Company has mastered the process route from the information via knowledge to the application whereby we were able to prepare and implement some innovative solutions enabling the lifetime of boilers turbines and piping to be extended at low costs in comparison with those of their replacement. Most interesting solutions are systematically presented by in the "Pro Novum Bulletin" - a supplement to the professional magazine "Power Industry" and during the Conferences including those organized by PRO NOVUM. The most technically advanced product that PRO NOVUM has been offering for two years is the LM System PRO® managing the knowledge on the technical condition of power plant equipment which can also be applied to support ERP systems. At present PRO NOVUM employees a group of experts well-versed in many fields of knowledge and maintenance of thermal and mechanical equipment in power plant.

Компания оказывает услуги в области инспектирования и оценки оборудования электростанций. Её клиентами являются почти все электростанции Польши, а также ряда зарубежных стран.

3401 LIEPAYA (Latvia)*

PRODUCTION OF FROZEN BALTIC SEA FISHES/SPRATS, COD AND SEMI PRESERVED AND CANNED FISH

The fish processing plant in Liepaja was started in 1892 and is considered one of the oldest in the Baltic countries. In 1945 it was nationalized and called LZKK counting with 1700 workers. In 1991, when the country separated from USSR only 700 workers were still employed. After privatisation, the enterprise shut his doors in 2002. In June 2003, we purchased the enterprise Kolumbija Ltd" engaged in wholesale fish trade. The main goal was to establish a competitive and stable manufacturing plant in Liepaja, near the most significant fishing places, according to old fish processing traditions. In 2003, we acquired the status of the Liepaja's Special Economic Zone (LSEZ). We reconstructed the buildings of the former LZKK and establish one of the most advanced fish processing plants in Latvia. On February 2003, we establish LSEZ PK Invest for engaged in processing and preserving of fish and fish products. We have become one of the ten leading Latvian exporters of fish products, able to ensure the services of primary fish processing and a wide range of canned fish products. The frozen food production is exported to Russia, Ukraine, Moldova and Bielorrusia. The company has a wide assortment of canned fish. Fish reception and sorting capacity reaches up to 200 tons per day, but the freezer capacity -2000 tons, which is 1700 tons of frozen fish and 300 tons of cooled fish. The current output of the reconstruction fish can manufacturing is 2.6 million cans per month. Currently, at PK Invest we produce high quality non sterilized shrimp products exported to Sweden. We have signed a contract with the distributor AVV Plus for Scandinavian hotels and restaurants situated in Latvia.

Предприятие является одним из старейших в странах Балтии и одним из десяти лидирующих латвийских экспортёров рыбной продукции, выпускающим мороженую рыбу и широкий ассортимент рыбных консервов.

423814 NABEREZHNIYE CHELNY (Russia)*

The main scope of activity of ZAO Tekhnotron is manufacturing of thermoplastic and thermosetting components, raw rubber compounds spare parts for motor cars. ZAO Tekhnotron has been developing successfully since 2002. During the years of productive work our company's consolidated its grip on market and showed itself as a safe partner. ZAO Tekhnotron holds a large modern base for the manufacture of thermoplastic and thermosetting components, raw rubber compounds as well as machining particularly complex body parts of ferrous and non-ferrous metals, 1. Production of components with the volume from 63 to 9650 cm³ and image plane area up to 40 dm² made of thermoplastic materials on basis of polyolefins (polypropylene, polyethylene), on basis of polyamides including glass-fibered, on basis of polysterene (polyamide, glass-fibered poliamid) including acrylonitrile-butadiene-styrene plastic (abc-plastic) and compounds ABC + PC, e.g. impeller. All the products are certified in compliance according to law currently in force. Production of goods made of oil-petrol-acid-base-frost-resisting rubbers, functioning in different climatic conditions and mediums (air, water, acids, alkali, oils, fuels, etc.) and in operating temperature range from -60C to +250C, of maximum overall dimensions to 1000 mm and image plane area 50dm³, weighing up to 100 kg, as any rubber-metal articles (glands, wheel shock-absorbers, etc.) Production of articles made of thermosetting compositions (reactive layers): phenol-and amino plastics, thermosetting material for pressing, polyester and epoxy plastic binder including glass-fibered with maximum overall dimensions to 1000 mm and image plane area of 50dm² weighing up to 100 kg, as well as clad plastic articles. Production of components with the volume from 0,01 to 6dm³ made of thermo materials (PP,PE,PA) by the method of blow-moulding. We specialize in production of: Car interior components (panel set, over-glass racks) shelves for lorries Air intake components(multicyclone air cleaners, air intakes) Cooling of the engine(electric coupling equipped impellers) Expansion tanks and their components. Gapless haulage hookup – dynamic force factor up to 22-23 t . General mechanical rubber goods for cars

Основной сферой деятельности ЗАО ПК «Технотрон» является производство деталей из термопластичных и термореактивных пластмасс, сырых резиновых смесей, запасных частей к автомобилям. Компания специализируется на производстве: деталей интерьера автомобиля, деталей воздухозабора и подготовки воздуха грузовых автомобилей; расширительных бачков и других изделий из пластмасс; резинотехнических изделий для автомобилей; тары-упаковки для фармацевтической и парфюмерной промышленности. Многие образцы продукции не имеют аналогов.
