

**Dr. Nader Riad Provides a Good Example of Community  
Participation**

**Dr. Nader Riad** has provided a wonderful example of social participation, highlighting the role of businessmen in serving the environment and society.

Not only has he set up a state-of-the-art school but he has also constantly piloted it and its pupils since it was inaugurated.

Through chairing the Board of Trustees of the school Riad has never saved effort to follow up the students, cooperating with Mr. Mohamed Aziz, its highly experienced and dedicated principal.

Aziz is excellent at intriguing the school staff so as to serve the target of the school.

**Dr Nader Riad**, says the Educational Zone General Manager Mr. Abd-El-Wanis Maghraby, is a unique example of businessmen of the golden age. He patronizes the students at the school which he named after himself.

Few days ago a German delegation visited the school.

They had a good impression about the activities done there: art, sports and culture. The members of the delegation were delighted with the great development of the school and of the neighboring ones.

They stated that Egyptian education achieved a renaissance.

They even recorded this in the visits record. Mr. Nabil Fahmy, vice president of the educational zone and Mr. Mahmoud Aziz share the hope that

businessmen would follow the example of **Dr.Nader Riad** whose role has effected prosperity and scientific excellence throughout the competitions they participated in and the certificates they got.
