

Secrets and Stories

Helal Conducts Investigation for the Technology College Contraventions

I tackled the paradoxes of the Technology College last week. It caught the attention of Minister of Higher Education and Scientific Research, Dr. Hany Helal. Hence, he gave his orders to refer the matter for investigation.

Actually, I trust Dr. Helal, despite the fact confirms that the responsible for book sale outlet in Mattareya is still free. Furthermore, he hasn't accepted liability for the issue.

Up until now, it hasn't been clear as to how 70% of teacher wages of the institutes affiliated to the Faculty were lost.

Perhaps Dr. Helal will also give his orders to quickly pay the wages to the teaching staff of the Press Institute for the study groups of the first class. As losing their entitlements for the books, caused by the delay in the payment of wages, is inappropriate.

Furthermore, Dr. Samia Omran has not moved a finger to alleviate the suffering of individuals. However, the most wonderful thing in this matter is that they are doing their work well in spite of the bitterness that they feel.

Linking graduates to market and progress requirements

On the other hand, when I criticize the Technology College in Mattareya, I don't give some individuals card blanche to distort the accomplishments achieved by Dr. Nader Riad, Head of the Board of Trustees of the College.

The spread of old corruption in the college has become clear. Hence, all hopes are pinned on the Board of Trustees of the College, who make the public interest come first and adopts a progressive vision under the slogan "Education for Employment". This slogan has become a reality through a protocol signed with the Egyptian Company for International Touristic projects.

The experiment addresses approximately two thousand students and has greatly linked the students to the labor market needs. Hence, students obtain contracts coinciding with their graduation.

There is a working plan of the unique Board of Trustees for signing a cooperation protocol with the Social Fund for Development (SFD) to support the division of small enterprises management and operation.

I believe that Dr. Nader Riad seeks also for activating the Twinship Convention between Optics Institute in Berlin and its counterpart in Mattareya to put it into force.

Therefore, I emphasize that we stand with the Board of Trustees in an effort to address corruption.

The university screen disappearance

I was surprised when I visited the University of Cairo as the giant television screen, set up by philanthropist efforts amounting to more than one million EGP, has disappeared. The screen was a tool used to establish a connection between the University and the outside audience, by providing information about current university activities.

Nevertheless, the screen disappeared because of a non-informed decision, thus resulting in the television being put aside instead of turning it into a unit that has a private nature. This unit can generate large income for the University, if a part time screening was leased to the advertising companies in accordance to the conditions set by the University, in order to ensure the type of the broadcast ads.

I'm really astonished. Actually, we are expecting an explanation for this secret from President of the Cairo University, Dr. Hossam Kamel.
